

Battery-powered shredder for private use

Better chips for better compost

Professional trimming and pruning keeps the plants, shrubs and trees in your garden healthy and strong. The garden waste which is being produced is also a valuable source of energy for new life in your garden. The decomposition cycle depends highly on the way how garden waste is cut. ELIET has a range of powerful shredders that produce chips with a special value for the cycle of nature.

BioTech™ chips

Through the cutting process according to the Chopping Principle™, chips are intensely bruised and frayed. These BioTech™ chips therefore have a favourable fibre structure that breaks down faster. After shredding, you immediately get a good and airy mixture with the correct level of humidity. That is how BioTech™ chips contribute to greater efficiency of your composting system.

ELIET Chopping Principle™

ELIET has developed and patented an unique shredder system, the Chopping Principle™. Just like a wood axe, the blades cut the wood by exploiting the weakness in its natural structure. The green waste is converted into small chips in a splitting and cutting cycle. This creates quick composting shredding material. The main advantage of the ELIET Chopping Principle™ is still its low power consumption. It is easier to cut wood by going with the grain, and this shredder system takes full advantage of this. That's how ELIET shredders achieve higher performance with less engine power. All of this means energy savings and less noise for you.

Everything good comes together

Proven ELIET chopping technology with innovative EGO battery system

Battery-powered version

- ▶ 56V 10Ah | 1h30 chopping capacity | 28 wheelbarrows
- ▶ 56V 5Ah | 45 min. chopping capacity | 14 wheelbarrows

ELIET Chopping Principle™

- ▶ Proven and patented ELIET chopping principle
- ▶ Reversible blades - lifetime, can be used on both sides

100 working hours

- ▶ Blades can be resharpened when already installed

56V 10Ah ARC Lithium battery

- ▶ Efficient shredding capacity
- ▶ Suitable for devices from the EGO Power range
- ▶ Future-oriented battery platform
- ▶ High quality for up to 1.200 charging cycles at full battery power

Maestro Country now with EGO Power+ System

- ⚡ Advantages battery version
- 🌿 No power loss due to extension cable
- 🌱 Ecologically in your garden
- 🌳 No exhaust gases
- ♻️ Shred flexibly

MAESTRO COUNTRY X EPOWER

SPECIFICATIONS

Maximum branch thickness	45 mm
Number of chopping movements/minute	48.000
Capacity (wheelbarrows/hour)	14
Number of blades	RESISTTM/6 (12 pcs.)
Collection bag capacity	80 L
Input height	1200 mm
Storage dimensions (L x W x H)	740 x 650 x 1050 mm
Weight	63 kg
Accessories	moisture sieve
Knives	Can be re-sharpened after installation, can be used on both sides
Battery voltage	56V
Protection class	IPX5
Battery compartments	2 PU2700_Dual Ports
Speed control	Eco/Turbo
Battery-status indicator	LED
Output power	3.03kW at 3200 rpm
